

Meghdutam Encore

Winner of Realty Plus Excellence Award 2016 – North for Green Project of the Year, Meghdutam Encore in Greater Noida is designed by Architect Hafeez Contractors.

The term 'green' or 'sustainable' building in construction or renovation generally refers to minimizing environmental impact and improving efficiency and long-term economic performance of new construction and renovation projects. The assessment and application of the principles of sustainability to the built environment are described in terms that complement the core philosophy such as green building, building assessment, ecological design, life-cycle assessment, life-cycle costing and high-performance building articulate specific techniques.

The complex has 80% cumulative green coverage and has international standard soft and hard landscaping with water bodies & fountains to add to the greens. The Project is designed to Meet USGBC LEED Green Homes Gold Standard.

This project features two-tier security systems with electronic surveillance along with innovatively designed gymnasium, fitness centre & clubhouse. It also offers sports facilities along with planned elevated walkways & jogging tracks.

Aniel Kumar Saha,
CMD – Saha Groupe

“We believe in promising more than the customer expects and delivering more than we promise. Our vision goes beyond providing the best of everything and make sure to be sustainable as well as Luxurious for that is what we promise.”

About the Developer

Saha Groupe is the culmination of over 30 years of experience in the real estate market with the desire to provide the market a product that is luxurious in true sense of the word as well as sustainable.

They are trying to bridge this gap with its new project launches in both residential and commercial spaces.
